HOW DOES LIGHTSTORM COMMISSIONS SYSTEM™ WORK?

Our software works from anywhere in the world using a browser and a high speed internet connection. Lightstorm Commissions System™ provides a central point of management for exchange rates, services charges, and user management.

HOW MUCH DOES LIGHTSTORM COMMISSIONS SYSTEMTM™ COST?

We offer a free demo of the Lightstorm Commissions System™ software. When you would like to select a plan we provide options tailored to your business needs.

CAN I OWN THE LIGHTSTORM COMMISSIONS SYSTEM™?

We offer ownership options to large enterprises and banks. Contact us to find out more.

IS LIGHTSTORM COMMISSIONS SYSTEMTM SECURE?

Security infrastructure revolves around the following guidelines: physical security, operations security, network infrastructure, and environmental controls.

Physical security audited by independent firms annually and entails locking down and logging all physical access to data centres, which are limited to only authorised personnel with 24/7 onsite staff.

Operational security is maintained through business processes and policies that follow security best practices and are continuously monitored. With high-performance bandwidth provided by multiple network providers, we eliminate single points of failure throughout a shared network infrastructure and monitor network route efficiency.

Our environmental controls, such as dual power paths into facilities, flood protection, and uninterruptible power supplies help mitigate the risk of service interruption caused by natural events.

HOW DO WE WORK WITH YOU?

We provide flexible plans with a monthly/yearly subscription. There are no minimum commitments, and you may choose to sign up with the Introduction plan and upgrade to Pro versions based on your business needs.

ARE THERE ANY LIMITS?

The system provides for unlimited users, branches, agents, currencies, and countries. You may choose a volume-based pricing or a flat per transaction fee to pay for the monthly services. You can also switch between different payment plans as your business needs change.

CAN MY DISTRIBUTOR USE THE SYSTEM?

Yes, you will be able to create payee agents or create a supervisor account for managing your distribution.

Lightstorm Global

PCI DSS COMPLIANT

CAN I USE THE SYSTEM IN OTHER COUNTRIES?

Yes, the system can be used in any approved multiple countries for domestic or cross-border transfers.

DO YOU PROVIDE ONLINE MONEY TRANSFER SOFTWARE?

Yes, the system offers an online customer module. Our software works from anywhere in the world using a browser and a high speed internet connection.

DOES THE SYSTEM OFFER ANY ACCOUNTING FEATURES?

The system provides transaction activity, profit&loss, commission reports. In addition, we can provide data for importing into an accounting software of your choice. We also offer complete integration with accounting software for our Enterprise clients.

CAN I LIMIT MY AGENTS?

Yes, you can set up agent credit limits and reconcile their accounts with daily or weekly deposits.
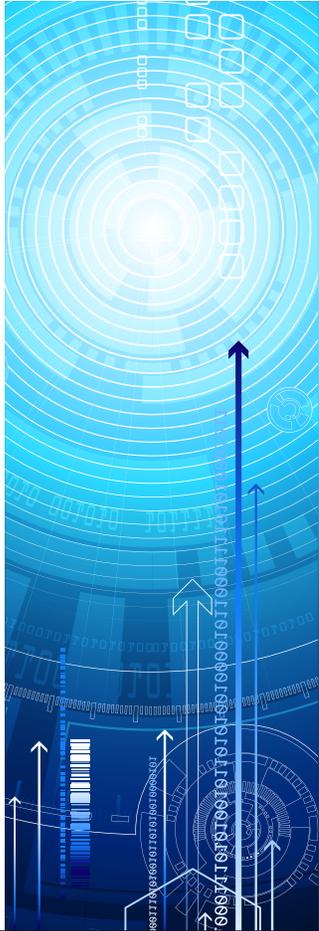

CAN YOU MIGRATE MY EXISTING DATA?

Yes, for a consulting and customisation fee, we can migrate your existing data to help you with the software transition.

HOW LONG DOES IT TAKE TO SET UP THE SYSTEM?

It takes as little as 3 business day to set up at your business location!

ABOUT US

For close to a decade, we have been building on the principles that got us started – creative integrity, collaborative thinking, and a cross-discipline approach to brand development.

We build the platforms, products, and experiences that transform businesses and help them thrive. Our team consists of graphic designers, coders and development engineers working together to expand the possibilities of design thinking, technology and product experiences.

As the world moves forward in pushing the boundaries of what's technologically feasible, our interest and focus remain on the products that push the boundaries or what is technologically meaningful.

At Lightstorm, we have the tools and vision to develop the apps which compliment your business and our other software solutions. Working in conjunction with our world class platforms, the apps allow your client base to access their transactional data in real time, anytime, anywhere. Engage with our team to discuss whether we can create an app that's right for you.

OUR CLIENTS

We have the privilege of working with some of the most well known companies in the world and we don't take this lightly. We work with a number of industries ranging from technology, to consumer—pharmaceutical and more. Our clients engage us in a number of ways - we help them thrive in a networked world . We view our clients as partners and work collaboratively with them to achieve results they can measure.

Usana Health Sciences, Inc., is a Utah-based multi-level marketing company that produces various nutritional products and nutraceuticals.

Lightstorm has developed a solid, robust and reliable platform for Usana, and over the years, the Commission System has become a key tool which has allowed Usana to grow and expand their business across multiple currencies and countries. The commission platform facilitates commission payments to their associates across multiple currencies, and provides them with the ability to cash these commission funds out to their local bank accounts.

As Usana's requirements have changed over the years, our solutions have developed to cater to these changes. Taking the development nuisances away from their everyday operating environment allows Usana to focus and grow their business, whilst Lightstorm quietly work behind the scenes to improve and streamline their solutions. The final result ensures that Usana have the confidence and capacity to expand their foot print to other markets across the globe.

OUR CLIENTS

Our business and its brands operate in a highly competitive market place and in today's age of technology, we are forever presented with challenges. Our people and the value they represent cannot be underestimated but like us, today's consumers are better educated and their loyalty cannot be taken for granted. We wanted to show our customers that we understand that they have choices and we wanted to express our appreciation of their continued loyalty. This led us on the journey to creating our loyalty program and one that offers "real rewards".

Our partnership with Lightstorm Global has been hugely important part of taking our idea from a concept stage to being a fully developed program that operates both locally and nationally with seamless execution. Lightstorm from the beginning although not in our industry or business seemed to get our business and this has created a great synergy between our organisations.

Our criteria and the challenges it presents were many but we needed a program, a platform which was easy to navigate when our work force is so diverse, a program that actually delivers on our commitment to really rewarding our customers. This

program is and has been successfully developed to operate across our organisation for many years and today it is even more important to keep developing it and progressing with new technology that brings new opportunity!

From a management perspective I am able to stay connected with our locations and our customers by the back end facility which gives me real results in real time! The power of the information enables us to make better observations and decisions when we know the data is current and relevant. Lightstorm have equipped myself and my colleagues with a powerful tool to continue to grow our teams and to reward our valuable customers.

Our customers are our best advocates for our loyalty program and through their continuing support we are able to continue to grow our people and our business. My advice is if you are wanting a real program that really works … then get Lightstorm on the team and let them get you connected!

- Amanda Whitman, Optimal Business Development Manager
